An electronic newsletter for SERS Retirement Coordinators

Agency Payroll Coordinators

Members on an approved medical leave of absence and receiving a disability benefit from the State Employees' Retirement System (SERS) should not be paid for benefit days from the agency while receiving a benefit from SERS. Members receiving pay from the agency during a period that they were paid by SERS creates an overpayment of benefits and the member will be responsible to repay their benefit time **to the agency**. The agency will be required to do a payroll reversal of retirement contributions as well.

If a member contacts you about paying them benefit time while away from work on an approved medical leave of absence, contact SERS at sers@srs.illinois.gov to verify that the member is not receiving benefits.
